

# Quake®: Mucus Clearance Device

**The Quake® is an innovative and unique device that provides mucus clearance therapy in a portable, easy-to-use, handheld device.**

The Quake®'s soft touch handle allows the patient to regulate rotation frequency and vary percussive pressure differentials within the lungs during both inhalation and exhalation. The Quake® provides optimum performance in any patient position and offers effective results due to its "Flow Independent" design. The Quake® truly allows for individualized therapy that meets each patient's mucus clearance needs ([www.thayermedical.com/quake.htm](http://www.thayermedical.com/quake.htm)).

*Disassembled  
Quake® view.*

- Position-Independent
- Flow-Independent
- Patient Controlled by Rotation of Handle
- Percussion on Inhalation and Exhalation
- Portable
- Hand-Held
- Fits Standard 22mm Face Mask

**Easy to clean:** The Quake®'s simple, two-part design enables the user to easily and quickly disassemble and reassemble the Quake for cleaning. It can be cleaned with soap and water, boiled in water, or washed in a dishwasher. The Quake® can also be put in a Quick-Clean™ Micro Steam™ bag and steam cleaned in the microwave.\*

**The Quake® is designed to meet the demanding mucus clearance needs of a variety of different types of patients, including:**

- Long-term, sputum-producing respiratory diseases
- Short-term, sputum-producing respiratory infections

**Feel the power.  
Experience the sensation.**
